

River Knuuttila

Lowell MA, (808) 223-4780 | github.com/qt-ami3
riverknuuttila2@outlook.com

Education

West Hawaii Explorations Academy

April 2020 – April 2023

Mount Wachusett Community College

October 2025 – Current

Projects

AI Job search & Coach

February 21st 2026 – Current

- Developed countermeasures to obfuscated CSS/HTML variables.
- Researched and architect-ed tech stack to the specification's of the project.
- Engineered project quick deployment for bug fixing and feature releases.

Right now the LLM runs with direct access to the user(s) database. To redesign the app; I would send information to agents in a virtual machine to avoid a data-breach via prompt injection.

Open-source coding agent, owner; Yeyito

March 27th 2026 – Current

- Collaborating on developing features pull requests and fixing merge conflicts.
- Developing solutions for edge-cases, and patching security vulnerabilities.
- Utilized clean room engineering principles to improve tooling architecture.

If I were to architect the project I would stick to utilizing one file-system standard, going as far to make an alias to the executable so the user could rely on their expectations when developing or configuring.

Game with Engine coded in Go

Jan 8th 2026 – March 10th 2026

- Coordinating team of people to effectively utilize available hours.
- Utilizing Object-oriented programming to drive demanding game logic.

A hard learned lesson. Scaling models to the resolution, and the game time to the frame rate were not accounted for, resulting in; collision being off depending on the resolution, and the game speed varying on the frame-rate.

Front-End: Next.js, React, TypeScript.

Back-End: C++, Go, Python, Git, Linux, AWS.

Soft Skills: Team communication, Sorting algorithms, creating/following style guides.
